

HYPERVSN™

Hypervsn™ is a revolutionary media solution for creating, managing and displaying 3D video content with holographic effect. It is a unique combination of a hi-tech projection unit and a proprietary management platform that allows to upload content wirelessly and manage all devices remotely from a single location.

Hypervsn™ solution by Kino-mo, a British company headquartered in London, received an array of awards including Top 3 UK Innovations of the Year and was named among World's 10 Most Impressive Technologies by Mashable, Yahoo! and USA Today.
